DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to a method of treating a primary tumor and a metastatic tumor, classified in class 424, subclass 277.1.
- II. Claims 16-32, drawn to a method for treating acellular organisms, classified in class 424, subclass 274.1.
- III. Claims 33-44, drawn to a method for treating cellular organisms, classified in class 424, subclass 234.1.

In addition, upon the election of group I, further election of the following patentably distinct species of the claimed invention is required:

An intravenous injection, an injection proximate to the primary tumor site, a topical administration, a subcutaneous injection, and an injection within the primary tumor site.

Upon the election of group II, further election of the following patentably distinct species of the claimed invention is required:

An acellular organism, fungus or virus, wherein the acellular organism is generic to fungus and virus.

An intravenous injection, an injection proximate to the acellular organism site, a topical administration, a subcutaneous injection, and an injection within the acellular organism site.

Upon the election of group III, further election of the following patentably distinct species of the claimed invention is required:

A cellular organism, bacteria, parasite, wherein the cellular organism is generic to bacteria and parasite.

An intravenous injection, an injection proximate to the cellular organism site, a topical administration, a subcutaneous injection, and an injection within the cellular organism site.

Upon the election of any one of groups I-III, further election of the following patentably distinct species of the claimed invention is required:

Administration of an adjuvant or an immune modulator before, during or after the administration of photodynamic light therapy.

The inventions are distinct, each from each other because of the following reasons:

The methods of groups I-III are distinct from each other because they differ at least in objectives, and/or schedules used, response variables and criteria for success.

The species routes of administration are distinct because they could produce different effects.

The species administration of an adjuvant or an immune modulator before, during or after the administration of photodynamic light therapy are distinct, because they could produce different effects.

Because these inventions are distinct for the reason given above and have acquired a separate status in the art, and because the searches for the groups are not co-extensive, restriction for examination purposes as indicated is proper.

Applicants are required under 35 USC 121 to elect a single disclosed group for prosecution on the merits to which the claims shall be restricted. Applicant is further advised that if Applicant elects a group having species requirement, a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 USC 103 of the other invention.

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be

accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
